

CHANGESET 005

File: `components/TrustBar.tsx` (NEW FILE)

Reason

No existing Trust Bar component. The approved reviews (Municipal Procurement, Trust Elevation) demand a persistent, full-width bar at the bottom of every page containing: CVR number, municipal approval, and ISO certification. This is a baseline hygiene element for procurement officers and a trust signal for families.

Old Code

No existing Trust Bar. The footer likely contains:

```
<footer>
  <p> 2026 Premium Care ApS</p>
  <div>
    <a href="/facebook">Facebook</a>
    <a href="/linkedin">LinkedIn</a>
  </div>
</footer>
```

New Code

Create `components/TrustBar.tsx`:

```
export function TrustBar() {
  return (
    <div className="trust-bar">
      CVR: 12345678 • Godkendt af Københavns Kommune • Dansk Arbejdsmiljø • ISO 9001:2015
    </div>
  );
}
```

Note: Replace 12345678 with actual CVR. Replace `Københavns Kommune` with actual approving municipality. The component is already placed in `layout.tsx` (see CHANGESSET 002).

Expected Result

- 32px full-width bar at bottom of every page
- Midnight Navy background, Regal Gold text
- Content: CVR · Municipality · Dansk Arbejdsmiljø · ISO 9001:2015
- Uppercase, letter-spacing 0.05em, 13px, Cormorant Garamond 500
- No social media links. No newsletter. No “Follow us.”

Testing Notes

1. Load any page: verify bar at bottom, 32px height
2. Inspect: verify background #061D37, text #C4A05F
3. Verify text is uppercase with letter-spacing
4. On mobile: verify bar remains full-width, text does not wrap (may need `white-space: nowrap` or smaller font on mobile)
5. Check contrast: verify WCAG AA (gold on navy passes)

Accessibility Impact

- **Positive:** Persistent credentials visible to all users, including screen reader users (if marked up as `<footer>` or with `aria-label`)
- **Positive:** High contrast (gold on navy) passes WCAG AA
- **Needs attention:** Add `role="contentinfo"` or wrap in `<footer>` for semantic landmark

SEO Impact

- **Positive:** CVR and ISO 9001:2015 are trust signals that Google may parse for E-E-A-T
- **Positive:** Municipal approval signals local relevance for Danish search queries
- **Neutral:** No direct ranking impact

Trust Impact

- **Critical:** Persistent credentials signal transparency. Municipalities never have to search for them.
- **Critical:** Absence of social media links signals that this is an institution, not a brand seeking followers.
- **High:** ISO 9001:2015 is a procurement baseline. Its presence removes a potential exclusion criterion.
- **Medium:** CVR signals legal accountability and Danish registration.
