Office Template Suite

Microsoft Office, Email & PDF Templates

Version 1.0 · Confidential Governed by the Brand Bible v1.0, Editorial Design System v1.0, and Master Implementation Specification v1.0 Fallback font stack: Georgia (serif) · Verdana (sans) — municipal machines will not have Berlingske

00 · SUITE OVERVIEW

This suite provides ready-to-use templates for every document type a Premium Care employee, partner, or municipal contact will produce. Every template embeds the brand identity at the point of creation — not as an afterthought.

The principle: Internal documents receive the same typographic care as client materials. We do not keep two standards.

Font fallback doctrine: Because municipal machines, partner offices, and employee home computers will not have Berlingske installed, every template specifies the fallback stack:

- Serif contexts: Georgia → Times New Roman
- Sans contexts: Verdana → Arial
- The fallback stack is embedded in the template styles and produces a dignified, legible page even without the brand fonts.

All templates are accessible: Tagged headings, logical reading order, alt text placeholders, sufficient contrast, and screen-reader compatible tables.

06 · TEMPLATE DISTRIBUTION & GOVERNANCE

Distribution:

- Templates stored on the brand intranet (password-protected)
- Direct download links for employees and approved partners
- Municipal partners receive templates via secure transmittal with version note

Version control:

- Template version number in filename and document properties
- Update notifications sent to all registered users
- Superseded templates moved to _ARCHIVE/ with sunset date
- No local modifications permitted — if a template doesn't fit, escalate to Custodian

Training:

- New employee induction includes 30-minute template walkthrough
- Annual refresher for all staff who produce documents
- Municipal partner onboarding includes template distribution and compliance confirmation

Enforcement:

- IT policy: Only approved templates may be used for external communication
 - Document review: Random sampling of outgoing documents for brand compliance
 - Non-compliance: Gentle correction first, escalation to line manager if repeated
-

End of Office Template Suite v1.0. These templates embed the brand at the point of creation, ensuring that every document — whether produced by a designer in Copenhagen or a caseworker in Aarhus — carries the Premium Care standard.
