

PREMIUM CARE

Vector Origination Specification

Master Artwork Production Brief for Adobe Illustrator

Version 1.0 · Confidential · Approved for Production Governing documents: Brand Bible v1.0, Editorial Design System v1.0, Master Implementation Specification v1.0

00 · PRODUCTION MANDATE

This document is the production brief for the faithful vector origination of the approved Premium Care visual identity. Every measurement, coordinate, and colour value herein is derived from the approved master reference and the construction system defined in the Master Implementation Specification §03.

Doctrine: Origination is reproduction, not redesign. No proportion, angle, figure gesture, or crown detail may deviate from the approved reference. The production artist must work from this specification and the approved logo PNG side-by-side at 100%, 400%, and 25% scale.

Deliverable: One master AI file (CC 2024 compatible) with all lockups, construction guides, and colour swatches, plus individual exported files per the Asset Production Specification §06–08.

01 · DOCUMENT SETUP

1.1 Artboard

- **Primary artboard:** 500 × 500 mm
- **Units:** Millimetres (mm)
- **Grid:** 1 mm major, 0.1 mm minor
- **Snap to grid:** OFF (optical corrections override geometric precision)
- **Rulers:** Origin at top-left corner of shield bounding box

1.2 Colour Mode

- **Document colour mode:** CMYK
- **Spot colours:** Pantone 282 C (Navy), Pantone 871 C (Gold), Pantone 186 C (Red)
- **Process builds:** As specified in §04 of this document
- **Swatch library:** All colours named per the convention below; no unnamed swatches permitted

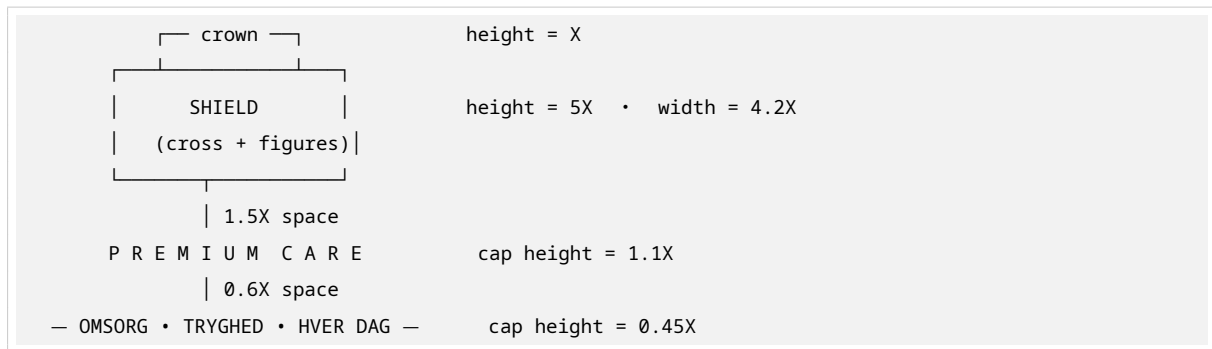

1.3 Layers (locked hierarchy)

L0_CONSTRUCTION	— Construction lines, guides, clear-space boxes (non-printing)
L1_MASTER_VECTOR	— The approved logo paths (shield, crown, figures, wordmark)
L2_LOCKUPS	— All derived lockups (VT, HZ, SH, WM, MG, CR)
L3_COLOURWAYS	— Layer states for each colourway (FC, NV, WH, BK, GD, 1C)
L4_SECONDARY	— Icons, patterns, graphic elements
L5_REGISTER	— Asset register metadata boxes

02 · THE CONSTRUCTION UNIT (X)

The unit **X = the height of the crown** in the Vertical Lockup (VT). All proportions, clear spaces, and placements are expressed in X.

VT Reference Lockup — Proportional Stack:

Horizontal Lockup (HZ) — Proportional Relationship:

- Shield height = 3.4X
- Type block centred on the shield's optical middle = 54% of shield height (not 50%)
- The crown lifts the visual centre; the geometric centre reads as drooping

03 · MASTER VECTOR — THE SHIELD

3.1 Shield Outer Path

The shield is a modified heater shield with a barely perceptible entasis (swell) on the side walls.

Path coordinates (relative to shield top-left origin at 0,0):

```

M 0,0
L 100,0
C 100,0 105,2 105,8
L 105,65
C 105,100 55,130 50,135
C 45,130 -5,100 -5,65
L -5,8
C -5,2 0,0 0,0
Z

```

Key specifications:

- Overall shield width at top: 100 units
- Overall shield height: 135 units
- Side wall entasis: 1.5° outward swell from vertical (not a pure rectangle)
- Bottom curve: asymmetric — the point sits 2% below geometric centre (heraldic convention)

- All curves: Bézier with single control point per side (no compound curves)

3.2 The Dannebrog Cross

The cross divides the shield into four quadrants. It is NOT geometrically centred — it sits 2% above true centre.

Vertical bar:

```
M 42,5
L 58,5
L 58,80
L 42,80
Z
```

Horizontal bar:

```
M 5,60
L 95,60
L 95,72
L 5,72
Z
```

Cross colour: Porcelain White (#FAFAF7) in FC colourway

3.3 The Two Figures

The figures are the entire brand ethic in silhouette. One person steadies another. Support is given at eye level, between equals. Never carer-above-client.

Figure A (left — with cane):

Head (circle):

```
M 18,35
A 6,6 0 1,1 18,47
A 6,6 0 1,1 18,35
Z
```

Body (vertical stroke with slight forward lean):

```
M 18,48
L 18,75
```

Stroke: 3 pt weight, rounded caps, colour Gold (#B9A26A)

Cane (vertical line, left of figure):

```
M 8,55
L 8,85
```

Stroke: 2 pt weight, rounded caps, colour Gold

Arm (support gesture — reaching toward Figure B):

```
M 18,62
Q 22,58 26,62
```

Stroke: 1.5 pt weight, rounded caps, colour Gold

Figure B (right — receiving support):

Head (circle):

```
M 32,35
A 6,6 0 1,1 32,47
A 6,6 0 1,1 32,35
Z
```

Body:

```
M 32,48
L 32,75
```

Stroke: 3 pt weight, rounded caps, colour Gold

Arm (receiving):

```
M 32,62
Q 28,58 24,62
```

Stroke: 1.5 pt weight, rounded caps, colour Gold

Critical rule: The support gesture is a gentle curve, not a straight line. The hand position is implied, not drawn — the curve suggests contact without detailing fingers.

3.4 The Crown

The crown sits centred on the shield's top edge, overhanging by its base width.

Crown path:

```
M 35,-12
L 40,-22
L 45,-12
L 50,-22
L 55,-12
L 60,-22
L 65,-12
L 70,-18
L 65,0
L 35,0
L 30,-18
Z
```

Crown band (the base):

```
M 35,0
L 65,0
```

```
L 62,6
L 38,6
Z
```

Centre jewel (circle, overhanging the band by 0.1X):

```
M 50,-18
A 3,3 0 1,1 50,-12
A 3,3 0 1,1 50,-18
Z
```

Star finial (optically centred, not mathematically):

```
M 50,-26
L 52,-22
L 56,-22
L 53,-19
L 54,-15
L 50,-17
L 46,-15
L 47,-19
L 44,-22
L 48,-22
Z
```

Crown colour: Gold (#B9A26A) in all colourways except BK (Black) and NV (Navy single-colour)

04 · THE WORDMARK & STRAPLINE

4.1 Wordmark: “PREMIUM CARE”

Typeface: Berlingske Serif (Light weight for VT, Regular for HZ) **Treatment:** The wordmark is NOT live type in the final master — it is converted to outlines. However, a companion live-type file must be retained under lock.

Letterspacing: Optically kerned in the master. Do NOT re-set from font metrics. The spacing has been judged by eye for even colour.

Key optical judgements (do not “correct”):

- The space between “PREMIUM” and “CARE” is 1.2× the internal letterspace
- The “M” and “C” have slightly tighter sidebearings than standard metrics (the serifs create optical expansion)
- The crossbar of the “E” in PREMIUM aligns with the shield’s horizontal crossbar (±0.5 mm tolerance)

Cap height: 1.1X (where X = crown height)

4.2 Strapline: “OMSORG • TRYGHED • HVER DAG”

Typeface: Berlingske Sans (Light weight) **Treatment:** Outlined in final master; live-type companion retained.

Interpuncts: The “•” characters are set in Gold (#B9A26A), with hair spaces (U+200A) either side. They are NOT standard bullet points (U+2022) — they are the interpunct (U+00B7) at a larger size for visual weight.

En-dashes: The strapline is bookended by em-dashes (—) in Gold, hair-spaced from the text.

Cap height: 0.45X

4.3 Wordmark-to-Strapline Spacing

- Vertical gap between wordmark baseline and strapline cap height: 0.6X
- The strapline is optically centred under the wordmark, not mathematically (the “G” in DAG creates a visual pull leftward; compensate +0.05X right)

05 ·LOCKUP CONSTRUCTIONS

5.1 Vertical Lockup (VT) — The Reference

Total bounding box: Width = wordmark width + 2X ·Height = crown (X) + shield (5X) + gap (1.5X) + wordmark (1.1X) + gap (0.6X) + strapline (0.45X) = **8.65X**

Horizontal centreline: The shield’s vertical axis and the wordmark’s optical centre align at 50% of total width.

Vertical stack (from top):

1. Crown top: 0
2. Crown base / shield top: X
3. Shield bottom: 6X
4. Gap: 1.5X → wordmark top at 7.5X
5. Wordmark cap: 1.1X → wordmark baseline at 8.6X
6. Gap: 0.6X → strapline top at 9.2X
7. Strapline cap: 0.45X → total height at 9.65X

(Note: The crown overhangs the shield top by its base depth; the shield origin is at the crown base line.)

Clear space: X on all four sides (measured from the outermost element in each direction)

5.2 Horizontal Lockup (HZ)

Shield: Height = 3.4X, positioned left **Type block:** “PREMIUM CARE” + strapline, positioned to the right of shield **Vertical alignment:** The type block’s optical centre aligns with 54% of the shield height (measured from shield top). This is NOT 50% — the crown lifts the visual centre upward.

Horizontal gap between shield and type: 1.2X

Clear space: X on all four sides

5.3 Shield Only (SH)

Contents: Crown + Shield + Cross + Figures (no wordmark, no strapline) **Bounding box:** 4.2X wide × 6X tall (shield) + crown overhang **Clear space:** X on all four sides **Minimum size:** Print 8 mm · Digital 24 px · Embroidery 25 mm

5.4 Wordmark Only (WM)

Contents: “PREMIUM CARE” + strapline (no shield, no crown) **Restricted use:** Narrow formats (document spines, pen barrels) — Custodian approval per use **Clear space:** X = 0.6× wordmark cap height

5.5 Monogram (MG)

Contents: Interlocked “P” and “C” beneath a reduced crown **Crown height:** 0.6X (reduced from full crown) **Letterforms:** Berlingske Serif, drawn as custom interlock — NOT typed and converted **The “P” and “C” share a vertical stem:** The bowl of the “P” and the “C” nest, creating a single vertical mass **Clear space:** 0.8X on all sides **Minimum size:** Print 6 mm · Digital 20 px · Foil 12 mm

5.6 Crown Only (CR)

Contents: Crown silhouette only, no shield, no type **Use:** Favicon, embroidery accents, micro-formats **Minimum size:** Print 5 mm · Digital 16 px · Embroidery 15 mm **Clear space:** 0.5X on all sides

5.7 Favicon (FV)

Contents: Pixel-fitted crown (CR) at 16×16, 32×32, 48×48 px **This is a dedicated micro-master:** The print vector may NOT be scaled down to 16 px — it produces mush. **At 16 px:** The crown is simplified to 5 points (not 7), the jewel is a single pixel, the band is 2 px high **At 32 px:** The crown retains 7 points, jewel is 2×2 px **At 48 px:** Full crown detail, 3 px jewel **Colour:** Navy ground (#041E42), Gold crown (#B9A26A) **Background:** Transparent PNG + solid Navy tile for iOS

06 ·COLOUR SPECIFICATIONS

6.1 Master Swatches (Adobe Illustrator)

Create these swatches exactly. Name them per the convention. No unnamed swatches permitted.

Swatch Name	Colour Mode	Values	Usage
PC_Navy_282C	Spot Pantone	282 C	Primary ground, authority
PC_Gold_871C	Spot Pantone	871 C (metallic)	Accent, craft, keylines
PC_Red_186C	Spot Pantone	186 C	Shield only, heritage
PC_Porcelain	Process	C0 M0 Y2 K0	Air, clarity, clinical
PC_Navy_CMYK	Process	C100 M85 Y35 K60	Four-colour builds
PC_Gold_CMYK	Process	C25 M30 Y65 K10	Litho gold substitute

Table 1 – continued

Swatch Name	Colour Mode	Values	Usage
PC_Red_CMYK	Process	C0 M100 Y80 K5	Four-colour red
PC_Navy_RGB	RGB	R4 G30 B66	Digital screens
PC_Gold_RGB	RGB	R185 G162 B106	Digital screens
PC_Red_RGB	RGB	R200 G16 B46	Digital screens
PC_Porcelain_RGB	RGB	R250 G250 B247	Digital screens
PC_Black_100K	Process	K100	Mono reproduction only
PC_Warm_Grey_1	Process	C0 M2 Y4 K8	Subtle backgrounds
PC_Warm_Grey_2	Process	C0 M3 Y6 K15	Mid-tone documentation
PC_Warm_Grey_3	Process	C0 M4 Y8 K25	Darker documentation

6.2 Colourway Layer States

In the master AI file, create layer states (or artboard variants) for each colourway:

FC (Full Colour):

- Shield: Red (186 C)
- Cross: Porcelain
- Crown: Gold (871 C)
- Figures: Gold (871 C)
- Wordmark: Navy (282 C)
- Strapline: Gold (871 C)
- Permitted grounds: Porcelain, White, Light photography

NV (Navy):

- All elements: Navy (282 C)
- Permitted grounds: White, Porcelain only

WH (White):

- All elements: Porcelain/White
- Permitted grounds: Navy, Dark photography (contrast-verified)

BK (Black):

- All elements: 100 K
- Permitted grounds: White only
- Use: Mono reproduction, legal, newsprint, photocopy-critical

GD (Gold):

- All elements: Gold (871 C)
- Permitted grounds: Navy only
- Use: Premium contexts — covers, foil, vehicles, embroidery on navy

- **NEVER on white** — fails WCAG contrast (2.9:1)

1C (Single Colour Variable):

- All elements: One approved ink (Navy or Black by default)
 - Use: Co-branded municipal documents, engraving, etching — per approval
-

07 · ICONOGRAPHY — SERVICE SUITE

7.1 Master Grid

All icons are drawn on a **48 × 48 unit master grid** derived from the shield's proportions (4.2:5 0.84:1).

- **Live area:** 40 × 40 units (4-unit safety margin on all sides)
- **Stroke weight:** 2 units (= 1.5 pt at 24 px output)
- **Stroke style:** Constant weight. No variable strokes.
- **Corners:** External corners: 2-unit radius. Internal junctions: square. Terminals: rounded (1-unit radius).
- **Terminal dot:** Where a line ends without junction, it terminates in a 2-unit diameter circle (filled solid).

7.2 Human Figure Rule

Figures in icons follow the logo doctrine: support between equals, never carer-above-client. The two figures in any icon showing human interaction must be at the same eye level, with one steadying the other.

7.3 Service Icons (10 marks)

1. Hjemmepleje (Home Care)

- Motif: A simple house silhouette with a gentle window glow
- Grid: 40×40 live area, 2-unit stroke
- No cross, no medical symbols

2. Sygepleje (Nursing)

- Motif: A cup with steam (comfort, not clinical)
- Grid: 40×40 live area, 2-unit stroke

3. Demensomsorg (Dementia Care)

- Motif: A window with a gentle frame, suggesting a familiar view
- Grid: 40×40 live area, 2-unit stroke

4. Fysioterapi (Physiotherapy)

- Motif: Steadying hands in motion, suggesting gentle exercise
- Grid: 40×40 live area, 2-unit stroke

5. Ergoterapi (Occupational Therapy)

- Motif: Hands engaged in purposeful action (a cup, a pen)
- Grid: 40×40 live area, 2-unit stroke

6. Rehabilitering (Rehabilitation)

- Motif: An ascending path or steps, suggesting progress
- Grid: 40×40 live area, 2-unit stroke

7. Palliativ Omsorg (Palliative Care)

- Motif: A gentle hand resting, a candle flame (dignified, not sombre)
- Grid: 40×40 live area, 2-unit stroke

8. Praktisk Hjælp (Practical Support)

- Motif: A house with an open door, suggesting welcome and access
- Grid: 40×40 live area, 2-unit stroke

9. Ældrepleje (Elder Care)

- Motif: Two figures at eye level, one with a cane, connected by a gentle line
- Grid: 40×40 live area, 2-unit stroke
- Directly echoes the logo figures, simplified

10. Kommunale Kontrakter (Municipal Contracts)

- Motif: A document with a seal or stamp, suggesting official partnership
- Grid: 40×40 live area, 2-unit stroke

7.4 Corporate Icons (5 marks)

- Document (page with folded corner)
- Calendar (grid with single highlighted date)
- Location (shield-shaped pin, echoing brand mark)
- Contact (envelope with gentle curve)
- Download (arrow descending into a tray)
- Certification (shield with checkmark)

7.5 Navigation Icons (4 marks)

- Arrow (simple directional, 1.5-unit stroke at 16 px)
- Menu (three horizontal lines, 1.5-unit stroke)
- Search (magnifying glass, 1.5-unit stroke)
- Close (X, 1.5-unit stroke)

Navigation stroke reduction: At 16 px, the standard 2-unit stroke becomes 1.5 units for optical balance. This is a dedicated micro-master, not a scaled version.

7.6 Icon Colour Rules

- Navy on light grounds (Porcelain, White)
 - Gold on Navy grounds
 - Single-colour only — never two-tone, never gradient
 - Clear space: minimum $\frac{1}{2}$ icon width on all sides
-

08 · THE CROSS GRID PATTERN

8.1 Construction

The Cross Grid is a subtle background pattern derived from the shield's cross geometry.

Grid unit: 40 × 40 mm (at print scale) **Line weight:** 0.25 pt **Line colour:** Navy (#041E42) at 4% opacity **Pattern type:** Simple grid (horizontal and vertical lines intersecting)

Usage rules:

- Folder interiors: full coverage at 4%
- Tender covers: top third only, fading to 0% at 50% height
- Section dividers: full coverage at 4% (per EDS §10)
- Never used above 4% opacity — it becomes texture, not atmosphere
- Never used on body text pages — it competes with legibility

8.2 Illustrator Pattern Swatch

Create a pattern swatch named `PC_CrossGrid_4pct`:

- Tile size: 40 × 40 mm
 - Horizontal line: $y = 20$ mm, 0.25 pt, Navy 4% opacity
 - Vertical line: $x = 20$ mm, 0.25 pt, Navy 4% opacity
 - The intersection point (20,20) is the centre of the shield cross reference
-

09 · THE GOLD KEYLINE

9.1 Specification

The Gold Keyline is the brand's signature of craft — a 0.5 pt Champagne Gold rule used to frame, underline, and divide.

Weight: 0.5 pt (exact — not 0.49, not 0.51) **Colour:** Gold (Pantone 871 C or CMYK C25 M30 Y65 K10) **Cap:** Butt cap (not rounded — it must end cleanly) **Join:** Miter join

Usage contexts:

- H2 section heading underline: 24 mm long, positioned 12 pt above heading baseline

- Folio dash: 6 mm long, preceding page number
- Frame around callout boxes: 0.5 pt, forming a complete rectangle
- Table rules: top and bottom of header band only
- Divider page: single 24 mm keyline beneath title

Prohibition: Never used as a decorative lattice, never as a page border, never in multiples (no double keylines, no keyline shadows).

10 · FILE NAMING & EXPORT

10.1 Master File

PC_Logo-MASTER_AllLockups_v1-0.ai

Contents:

- All 7 lockups (VT, HZ, SH, WM, MG, CR, FV) on separate artboards
- All 6 colourways as layer states
- Construction guides on L0 (non-printing, visible)
- Swatch library embedded
- Fonts: Berlingske Serif Light, Berlingske Sans Light (live-type companion layer)
- All text converted to outlines on L1 and L2

10.2 Export Files

Per the Asset Production Specification §08:

For each lockup × colourway combination:

Format	Naming Example	Notes
AI	PC_Logo-VT_FC_v1-0.ai	Master for that lockup/colourway
EPS	PC_Logo-VT_FC_v1-0.eps	Level 2, outlined, one colourway per file
SVG	PC_Logo-VT_FC_v1-0.svg	Optimised, presentation attributes, no embedded raster
PDF	PC_Logo-VT_FC_v1-0.pdf	PDF/X-4, one page per colourway
PNG	PC_Logo-VT_FC_v1-0.png	Transparent, @1× and @2×

Icon exports:

- PC_Icon-Service_Hjemmepjeje_NV_v1-0.svg (and .png @1×/@2×)
- PC_Icon-Corporate_Document_NV_v1-0.svg
- PC_Icon-Nav_Arrow_NV_v1-0.svg

Pattern export:

- PC_Pattern-CrossGrid_v1-0.ai (pattern swatch only)

10.3 Folder Structure for Delivery

11 · PRODUCTION CHECKLIST

Before the master file is approved for release, the production artist must verify every item:

Paths

- All paths closed (no open strokes in final outlines)
- No stray anchor points
- No compound paths where simple paths suffice
- All text converted to outlines on L1 and L2
- Live-type companion file created and locked on L7

Colour

- All colours from brand swatch library only
- No unnamed swatches exist in the file
- Spot colours correctly named (Pantone 282 C, 871 C, 186 C)
- Process builds match §06 specifications exactly
- No RGB colours in CMYK-mode document (except dedicated RGB artboards for digital exports)

Construction

- Shield entasis verified: 1.5° swell, not geometric rectangle
- Cross bar sits 2% above geometric centre
- Crown jewel overhangs band by 0.1X
- Star finial is optically centred
- Wordmark optical centre aligns with shield at 54% (HZ)
- All minimum sizes verified against §05
- Clear space X verified on all lockups with measurement tool

Typography

- Berlingske Serif used for wordmark (Light weight VT, Regular HZ)
- Berlingske Sans used for strapline (Light weight)
- Interpuncts are U+00B7, not U+2022
- Hair spaces (U+200A) around interpuncts
- Em-dashes (U+2014) bookend strapline
- Danish characters æ ø å render correctly in live-type companion

Icons

- All icons on 48×48 unit grid
- 2-unit stroke weight (1.5-unit for navigation at 16 px)
- 2-unit external corner radius
- Square internal junctions
- Rounded terminals with 2-unit dot
- Human figures at eye level, never carer-above-client

Files

- Master file saved as CC 2024 compatible
- All exports generated from master, not edited individually
- Naming convention followed per §10.2
- Version number present in every filename
- Folder structure matches §10.3

Approval

- Side-by-side comparison with approved logo at 100%, 400%, and 25%
- Custodian sign-off recorded in Asset Register
- Production date and artist name logged

12 · APPROVAL SIGNATURE

This specification has been approved for production. The vector origination must follow this document without deviation. Any ambiguity is escalated to the Brand Custodian — never interpreted by the production artist.

Role	Name	Signature	Date
Creative Director			
Brand Custodian			
Production Artist			
QA Reviewer			

End of Vector Origination Specification v1.0. Upon completion of the master vector file, this document and the master file are frozen together as the permanent source of truth for all Premium Care brand reproduction.
